PSG has been good at early-stage investments – building businesses

Use **PSG Alpha** to find new growth investments

Our investment philosophy

Large Market

- New investments should be in large markets:
 - Banking
 - Energy
 - Education
- If successful, the returns should be substantial

Market Dynamics

- Large inefficient incumbents:
 - "Free" services (education, energy
- Fragmented:
 - IFAs
 - Retirement villages

Engine Room

- Best management teams:
 - Think different
- Best operating models:
 - Service
 - Pricing
 - Experience

Earlystage investing

Balance sheet

- High-growth companies should have stronger balance sheets and make limited use of debt
- Management cannot simultaneously focus on high-growth (J-curve) investment opportunities and servicing debt:
 - Loss of focus and conservatism
- Window to capture the market

		Add	Non-headline FV adjustments on Evergreen's investment property (after-tax)
=	Recurring headline earnings	=	Recurring earnings

^{*} As per SAICA headline earnings circular

Rationale:

- Evergreen's financial performance is predominantly measured with reference to the FV adjustments recognised on its investment property (non-headline i.t.o. IFRS)
- ➤ With Evergreen being a sizeable investment, it is necessary to include such FV adjustments to provide management with a realistic measure to evaluate the group's earnings performance.

Observations:

- Most investee companies reported weaker recurring earnings (except Quantum and Kaap Agri)
- Positive impact due to no further management fees paid in terms of original agreement
- Negative impact of increased interest as a result of increased borrowings

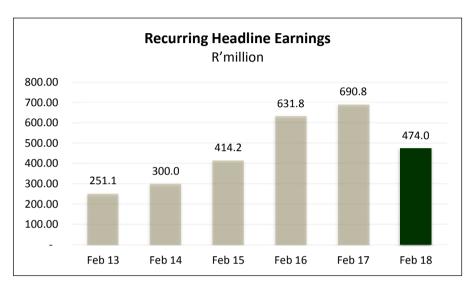

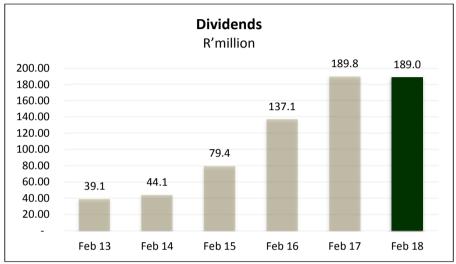

Context and dividends

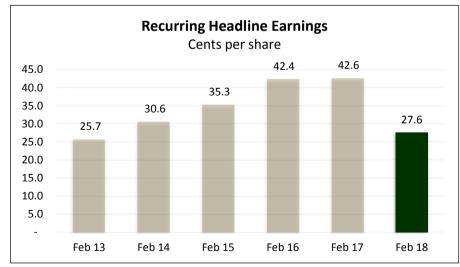

Performance review

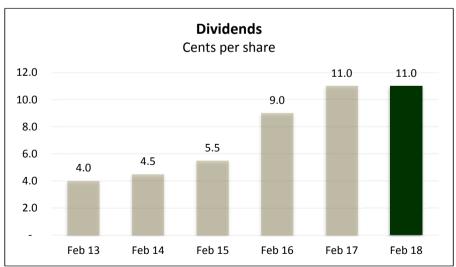

Despite the decline in earnings, the dividend has been maintained at 11c per share due to comparable cash generation and likely non-recurring factors.

FY2018

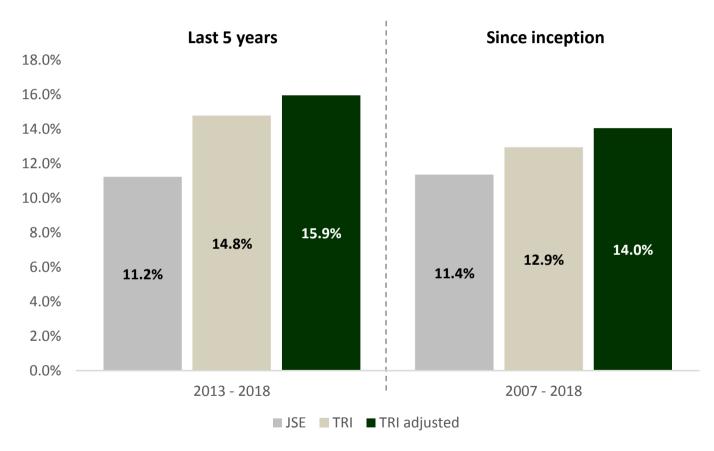

Total shareholder return

Performance review

Total shareholder return acceptable to date but objective remains to improve on this performance.

Shareholder value

Note: TRI adjusted by adding back management fees and treating this as dividends

Business overview

Portfolio evaluation

Capespan is an internationally diversified group with a primary exposure to fruit farming, marketing, distribution, port logistics and related services.

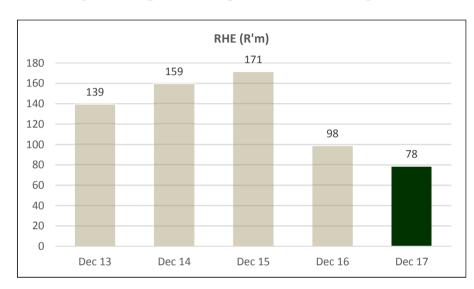

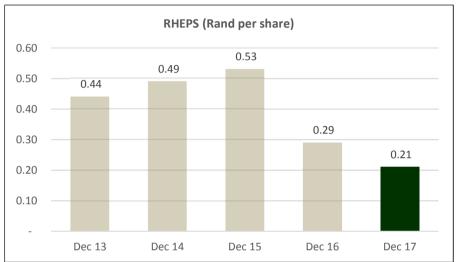

Financial performance

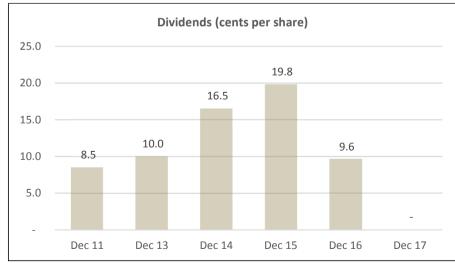

Portfolio evaluation

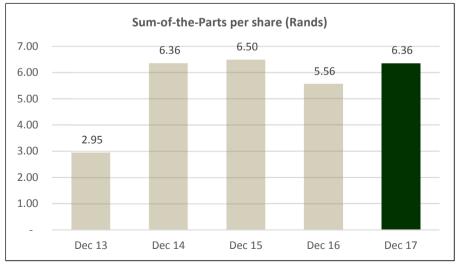

Capespan reported a 26.7% decline in RHEPS due to the lagged effect of volume declines following the drought and increased finance costs.

Historical review

Portfolio evaluation

The recent decline in RHEPS should not detract from the underlying investments made to drive medium- to long-term EBITDA growth and SOTP value creation.

Business overview

Portfolio evaluation

Zaad is a specialist agricultural seed company that develops and supplies a broad basket of proprietary seeds to more than 96 international markets.

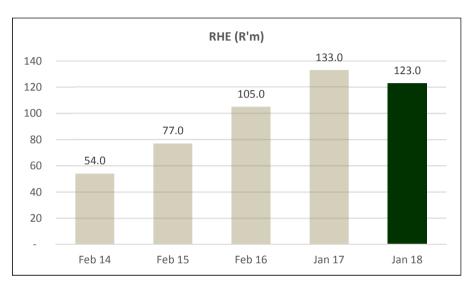

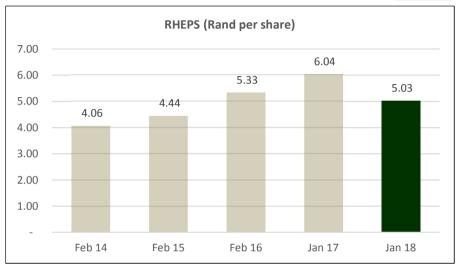

Financial performance

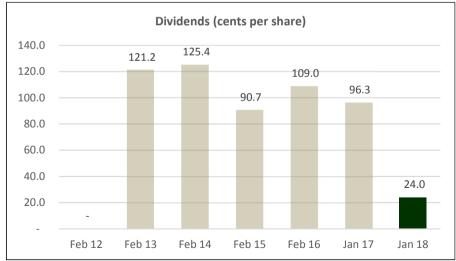

Portfolio evaluation

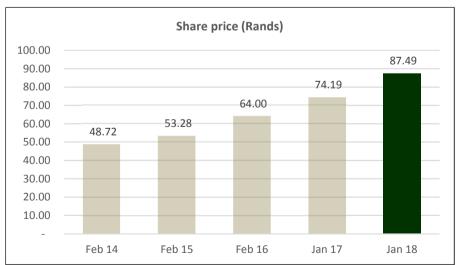

Zaad reported a decrease of 16.7% in RHEPS, driven in most part by weaker results in South Africa as a result of the drought and increased finance costs.

Historical review

Portfolio evaluation

Through a combination of strategic acquisitions, R&D and organic growth the group has been strengthened over the past 5 years.

Small seeds planted

New platform investments

We have acquired controlling interests in two new small companies that provide us with an affordable entry into smart urban farming and logistics related technology.

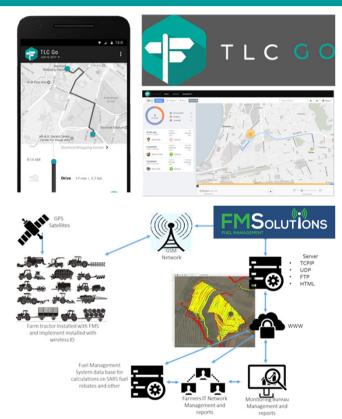

CAN-AGRI

- Urbanisation and vertical farming is a growing theme
- Decline in cost effective available agricultural land and damage to environment is forcing a rethink of the sustainability of current approach
- Identified a South African team and concept
- Committed to invest R40m for proof of concept phase
- Roll-out to be considered thereafter

THE LOGISTICS COMPANY

- · Invested R4m as seed capital
- Rapid growth possible but VC type risk
- Technology adoption in portfolio
- Technology adoption 3rd party logistics

Prospects

Conclusion

With a strong existing platform and focused addition of new opportunities, the prospects remain positive going forward.

General commentary

- Early indications of improved political, economical and climatic conditions in markets where our portfolio operates
- Indications of inflationary relief after period of sustained pressure
- Strong and well diversified portfolio that provides us with broad exposure to the industry
- Well developed strategies aligned to aligned to deliver sustainable growth
- Investments made (financed in part with debt) to deliver results in medium term
- Focus remains on recovery in the short term
- Platform growth continuously pursued exiting new avenues established, both within and adjacent to existing investments
- New and adjacent opportunities are reviewed on an ongoing basis

Despite the short-term challenges, we remain committed to deliver attractive shareholder returns over the next 5 years.

Thank you
